Networking for PhDs

Networking is a central activity for anyone seeking a successful career in industry, academia, non-profits, government, and many other fields. No matter what job you’re seeking, networking and forming meaningful relationships with other professionals is critical to any successful job search.

Networking 101: The Informational Interview

One of the best ways to grow your network is by conducting informational interviews.

An informational interview is a brief, 20-30 minute discussion with a professional in your chosen field about the work they do and what it takes to succeed in that field.

They can be conducted over the phone or in person.

Appropriate people to reach out to for informational interviews include family, friends, and alumni from your department, and anyone working for a company or organization that interests you.

Reach out to administrators in your department to inquire if they have a list of alumni you could reach out to.

Don’t ask for a job. Instead, always ask for information on how to succeed in a given field. Better questions include, “How did you become interested in the work that you are now doing?” or “What skills does someone like me need to develop in order to become a successful professional in this field? and “What is your favorite part of your current job?”

Thank people for their time. You should always send a thank you note to each individual who agrees to have an informational interview with you within 24 hours of the meeting.

Growing and Strengthening Your Network

Utilize tools like LinkedIn and the People Finder Tool on Versatile PhD to identify people doing work that interests you. Use hashtags like #phdchat to connect with other PhDs on Twitter.

Attend job fairs, conferences, workshops, and meetups in order to connect with people who share similar career goals, such as the annual MSU Expanded Careers for PhDs conference or the Mid-Michigan Versatile PhD meetup.

Networking is a “two-way street” so always state your interest in being of service to an organization or company. Offer to develop your skill set through volunteering, internships, part-time work, or interim opportunities.

Join LinkedIn groups like the Michigan State University Graduate Career Network or the Mid-Michigan Versatile PhD group to expand the number of people you will be able to reach out to on LinkedIn. You can join the MSU Alumni Association group on LinkedIn while still a student.

Keep your connections updated on your professional life. Make sure that your LinkedIn profile is up-to-date, and inform your connections every time their advice leads you to a professional success, such as a job or internship offer.
